

Mosab Najeeb Ali

Address: Saudi Arabia, Jeddah, Mushrifah district

Date of birth: 1/9/1995

Email: m.aljobihi@gmail.com

Nationality: Yemeni

Phone: +966559040738

Summary

An innovator and quality management specialist, he holds a BSc Honors degree in Chemical Engineering, with a strong background in Occupational Safety and Health Management. I have distinguished experience in the field of quality assurance in the plastic products industry, in addition to various training experiences in modern technologies, including nanotechnology and process modeling. I seek to apply my analytical and technical skills in a dynamic work environment that aims to achieve excellence and productivity.

Education

- Bachelor's degree of **Chemical Engineering** - with honors- from Sudan University of Science and Technology - 2023

Training courses and certificates

- **Managing Safely Course** - Institute of Occupational Safety and Health (IOSH).
- **Lead Auditor for Quality Management** - ISO 9001:2015 –Technical and Vocational Training Corporation, Jeddah
- **Mini Master in Total Quality Management** – London Academy for Training and Education, London.
- Training certificate in **quality management and engineering** - KAM Training and Development Center, Khartoum.
- Training certificate in **Quality Supervisor Skills** – Seventh Vision Institute for Training and Development, Khartoum.
- Certificate of attendance for a workshop on **food safety** - KAM Training and Development Center.
- Training certificate in **work permits** - KAM Training and Development Center, Khartoum
- Certificate of Training in **Mining Safety** - KAM Training and Development Centre, Khartoum
- Training certificate in **OSHA standards** - KAM Training and Development Center, Khartoum
- Training certificate in the field of **natural gas** - State University of New York via the Coursera platform
- Training certificate in **nanotechnology** - Chemical Engineering Club, King Abdulaziz University
- Training Certificate in **Process Modeling and Simulation 11V HYSYS Aspen** - Seventh Vision Institute for Training and Development, Khartoum
- **International Computer Driving License (ICDL)** training certificate - Edraak platform

Training programs

- Training program at Dal Dairy Factory (Cabo) - Production and Quality Control Department, Sudan, 2023
- Training program at Khartoum Refinery Company Limited - Sudan, 2022
- Training program at Khartoum State Water Corporation - Sudan, 2022
- Training program at Azal Pharmaceutical Industries Ltd. - Production and Quality Control Department, Sudan, 2022

Experiences

Quality Supervisor

Saudi plastic flasks factory

January 2024 - present

Functional tasks:

- Preparing and implementing quality plans and technical specifications: Developing quality plans and ensuring the application of technical specifications for products and processes.
- Monitoring production processes: Follow up production to ensure compliance with quality standards and identify areas that need improvement.
- Conducting periodic quality analyzes and checks: carrying out laboratory tests and analyzes to evaluate the quality of products and detect possible defects.
- Develop new quality policies and procedures: Create new policies and procedures to improve operational performance and ensure ongoing compliance.
- Training employees on quality standards: Provide training and guidance to employees on best practices and quality standards.
- Coordinating Quality Team Activities: Organizing work among Quality Team members to ensure compliance with legal requirements and environmental standards.
- Quality Data Analysis: Collect and analyze performance data for product and process quality for continuous improvement.
- Preparing quality reports and submitting them to senior management: writing and submitting periodic reports on quality performance and providing recommendations for improvement.
- Customer Complaints Management: Dealing with customer complaints related to quality, conducting necessary investigations, and providing solutions.
- Conduct internal audits: Organize and implement internal audits to ensure compliance with standards and policies.
- Raw materials control: Verifying the quality of raw materials used in production and ensuring that they comply with the required standards.
- Implementing occupational health and safety standards: Ensuring adherence to occupational health and safety standards within the factory.
- Document and Records Management: Manage quality records and ensure that documents are preserved in a way that allows for easy access and analysis.
- Identify and analyze key performance indicators (KPIs): Identify and analyze KPIs to measure and improve the quality of products and processes.
- Review of packaging operations: Ensure the quality of packaging operations to achieve the required specifications.

skills

personal skills

- Excellent communication and inter personal skills.
- Flexible, able to adjust to new people and situation...
- Organized, highly motivated, and detail-directed problem solver.
- Problem-solving skills and ability to think logically.
- Good organizational skills.
- Able to accept responsibility

Computer skills

- Microsoft Windows
- Microsoft Office
- Internet

Languages

- Arabic: mother tongue
- English: Very good
